Experience

Superhuman / Area Tech Lead

October 2025 - Present, Austin, remote

Building ubiquitous agentic AI for work and education.

Grammarly / Area Tech Lead, Grammarly Platform

September 2022 - October 2025, Austin, remote

Led Grammarly's platform organization before the company rebranded to Superhuman.

Grammarly / Engineering Manager, Grammarly for Developers

September 2020 - September 2022 (2 years 1 month), Austin, remote

With a PM partner led the team building Grammarly for Developers, Grammarly's new product and business line - from early prototypes, through public beta and GA launch in September 2022.

Grammarly / Engineering Manager, Identity and Data Platform teams

September 2019 - September 2020 (1 year 1 month), San Francisco

Switched to the engineering manager role. In addition to the Data Platform team, took on the charter and technical roadmap for the newly formed Identity team. Built identity foundations for Grammarly for Business (SSO, SAML, and basic RBAC) and Account Security pipelines for detecting and preventing credential stuffing attacks.

Grammarly / Technical Lead and later TLM, Data Platform

July 2014 - August 2019 (5 years 2 months), San Francisco

Started and grew the team that built Grammarly's in-house analytics and data pipeline capabilities. Enabled democratized data access through a custom SQL-based query language and powerful enrichment pipelines through a Scala-based DSL for dimension builders.

Amazon / Software Engineer, Kindle Community Workspace

October 2013 - June 2014 (9 months), Seattle

Built Goodreads integration with the Kindle ecosystem.

Pixonic / CTO

March 2011 - September 2013 (2 years 7 months), Moscow

Led work on AppMetr, an event-based analytics service for mobile and social games, and PixAPI Container, a client-server proxy API that generalized 18 social network and payment APIs.

Odnoklassniki.ru / Software Engineer

July 2010 - March 2011 (9 months), Moscow

Revamped the Groups feature in the second-largest social network in CIS.

Biletrix / Co-founder, CTO

January 2010 - March 2011 (1 year 3 months), Moscow

Built an early platform for selling concert and event tickets online for the local market.

KinoKrug / Co-founder, CTO

September 2007 - March 2011 (3 years 7 months), Moscow

Built a leading work-focused social network and online tools for the Russian media production market.

Netcracker / Software Engineer, System Performance

June 2005 - May 2007 (2 years), Moscow

Started part-time during college on a team tuning a large Java codebase and complex Oracle database deployments for performance and reliability.

Education

Moscow Institute of Physics and Technology (MIPT)

2002 - 2008

Master and Bachelor in applied physics and mathematics.
